

To Our Fellow Auto Industry Leaders,

We have a tremendous opportunity ahead of us: one of our colleagues is primed to join the ranks of the United States Senate. Bernie Moreno is a leading candidate and needs our help.

We all know the government ranks have plenty of lawyers and career politicians. They have too few great business minds. Auto dealers know, better than anyone, the necessity of innovation, risk management, customer focus, and excellence.

Our industry is facing tremendous upheaval and pressure. As government leaders consider the future of this business, environmental standards, electric car adoption, and other items that are central to our livelihoods — we need someone we can trust in the room.

The people of Ohio will trust him to do the job when they hear his message. We need to help him get the word out. That's why we're supporting the campaign. We've donated the maximum amount, \$5800, and we hope you will too. You can join the mission by [clicking here](#), or by scanning the QR code below.
